SUMMARY

Results-driven **Full Stack Software Developer** with hands-on experience in **MERN Stack (MongoDB, Express.js, React.js, Node.js)**, **Java**, and **Android development using Kotlin and Android Studio**. Skilled in designing and developing **scalable web and mobile applications**, building **RESTful APIs**, and delivering **responsive UI/UX solutions**. Strong knowledge of **database systems (MySQL, MongoDB)**, **authentication mechanisms (Firebase Authentication, JWT)**, **CRUD operations**, and **real-time data synchronization**. Experienced in **API integration**, **Git/GitHub version control**, **Agile development methodologies**, and software development lifecycle practices. Passionate about creating **efficient, secure, and user-focused software solutions** that solve real-world problems and enhance user experience.

EDUCATION

SRI LANKA INSTITUTE OF INFORMATION TECHNOLOGY

BSc(hons) in Information Technology Specializing in Information Technology Malabe |
Oct 2023 -

TECHNICAL SKILLS

- **Programming Languages:** Java, JavaScript, Kotlin, Python
- **Frontend Development:** React.js, HTML5, CSS3, Tailwind CSS, Bootstrap
- **Backend Development:** Node.js, Express.js, Spring Boot, RESTful APIs
- **Mobile Development:** Android Studio (Kotlin, XML UI Design), Firebase Integration
- **Databases:** MySQL, MongoDB, Firebase Realtime Database
- **Authentication & Security:** Firebase Authentication, JWT Authentication, Role-Based Access Control (RBAC)
- **API & Integration:** REST API Development, API Integration, Postman
- **Tools & Platforms:** Git, GitHub, VS Code, IntelliJ IDEA, Eclipse

PROJECTS

Web Projects

1. SMART ALERT – Student Management System

Group Project | Aug 2025 – Oct 2025 | MERN Stack, Firebase | [GitHub Repository](#)

A full-stack student management platform for attendance, transportation, examinations, and notifications.

My Contribution (Shuttle & Route Management Module):

- Developed a **MERN Stack-based Shuttle & Route Management System** with **real-time bus tracking**, **route optimization**, and transportation monitoring features.
- Integrated **REST APIs**, backend services, and live update mechanisms to improve communication between administrators, drivers, students, and parents.
- Built responsive and user-friendly interfaces using modern **UI/UX principles** to enhance accessibility and user experience.
- Collaborated in an **Agile development environment** using **Git** and **GitHub** for version control and team collaboration.

2. Smart Campus Hub – Facilities & Resource Management System

Group Project | React.js, Spring Boot, MongoDB, REST APIs, JWT Authentication | [GitHub Repository](#)

A full-stack campus facilities management platform designed to streamline maintenance operations and incident resolution workflows.

My Contribution (Incident Management Module):

- Developed a **full-stack Incident Management System** using **React.js, Spring Boot, MongoDB, REST APIs, and JWT Authentication**.
- Implemented **incident ticket management**, **file uploads**, **technician assignment**, **status tracking**, and automated notification workflows.
- Designed secure backend services with **Role-Based Access Control (RBAC)**, authentication, validation, and database operations to ensure data integrity and user authorization.
- Improved operational efficiency by enabling end-to-end incident reporting, tracking, and resolution management.

3. UniHostel – Hostel Management System Group

Project | MERN Stack | [GitHub Repository](#)

A full-stack hostel management platform developed to automate hostel operations, maintenance services, and student inquiries.

My Contribution (Maintenance & Inquiry Management Module):

- Developed a **MERN Stack-based Maintenance & Inquiry Management System** for submitting, tracking, and managing maintenance requests and student inquiries.
- Implemented **CRUD operations**, **form validation**, **request status tracking**, and centralized data management using **MongoDB**.
- Built responsive **React.js** interfaces and integrated **RESTful APIs** for seamless frontend-backend communication.
- Enhanced service management workflows through real-time status updates, Agile collaboration, and version control using **Git** and **GitHub**.

Mobile Application Project

WellnessMate – Personal Wellness App

Individual Project | Kotlin, Android Studio, Firebase | [GitHub Repository](#)

A personal wellness application for habit tracking, mood journaling, and hydration reminders with real-time data synchronization.

- Developed a **Kotlin-based Android app** with **Firebase integration** for **secure authentication**, **habit tracking (add/edit/delete)**, **mood journaling with emojis and notes**, **hydration reminders via notifications**, and **interactive charts (data visualization)** to track mood trends and support user wellness monitoring.

RELEVANT COURSE

- Object Oriented Programming
- Data Structures and Algorithms
- Mobile Application Development
- Database Management Systems

PROFESSIONAL SKILLS

- Problem Solving
- Team Collaboration
- Communication Skills
- Time Management
- Quick Learning

CERTIFICATION

- **University of Moratuwa:** Python For Beginner

INTERESTS

- Full-Stack Development
- Mobile App Development
- UI/UX Design
- Web Technologies
- Open-Source Technologies
